

High Powered PEMF Semi Kit Parts List

Completely populated motherboard/PCB

100 Watt 100 ohm heat sink resistor

1500 ufd Electrolytic 250 Volt capacitor (most expensive item)

Two 6 position rotary switches with 1K resistors mounted, included with PCB

Two rotary switch knobs, included with PCB

Two toggle switches for speed and time control, included with PCB

110 AC to 12 volt power supply with labeled pigtails

15 Amp on/off switch

12 volt cooling fan with grill

Push button pigtail software controlled function switch, included with PCB

Pigtail status with mounted current limit resistor LED

Case mounted fuse holder and 8 amp slow blow fuse.

6 foot power cord

Blank 6 x 5 x 3 Project Box

2 grommets (Used for power cord input & output)

2 Resistor Standoffs

2 nylon PCB standoff washers

10 mounting screws and nuts 4/40

2 tie wraps
