

## **NOTES ON PRESETS**

### **Frequency Converter Test**

The purpose of this test is to insure the Frequency Converter is basically working and there is a visual presentation of a flashing light when the night light is plugged in.

This preset is designed to run the 528 Hz Solfeggio Frequencies with a gating set to 1 second in the Spooky2 software. The Spooky2 'Wave' is set to 'Square', the Spooky2 'Amplitude' is set to 10 Volts, the Spooky2 'Offset' is set to +100%, and the Spooky2 'Duty Cycle' is set to 50%. Phase is left at zero.

Do not plug the Yellow Dotted input gating channel on the Frequency Converter to the Spooky2. Gating is controlled by the Spooky Software setting of .5 Hz.

### **DNA Repair**

This preset is designed to run 528 Hz Solfeggio Frequencies with a gating at the Schulman Resonance frequency of 7.83 Hz. The Spooky2 'Wave' is set to 'Square', the Spooky2 'Amplitude' is set to 10 Volts, the Spooky2 'Offset' is set to +100%, and the Spooky2 'Duty Cycle' is set to 50%. Phase is left at zero.

Do not plug the Yellow Dotted input gating channel on the Frequency Converter to the Spooky2. Gating is controlled by the Spooky Software setting of 3.915 Hz.
